About me

Hi, my name is Catarina, and I am interested in developing my career as a Frontend Developer.

The basis of my studies from my Bachelor's Degree is founded mainly on multimedia art, such as graphic design, video, 3D molding, and a little about HTML and CSS. Captivating my interest to learn more about Frontend, I recently took a course about Frontend and learned the basics.

Now I want to engage myself in the employment market and try my best to evolve in this field and learn more about it.
